Engineering Chemistry

Book · June 2012

CITATION

1

READS

119,790

3 authors, including:

Baskar Chinnappan

THDC Institute of Hydropower Engineering and Technology Tehri, Uttarakhand Te...

48 PUBLICATIONS 457 CITATIONS

[SEE PROFILE](#)

Ranjit Dhillon

Punjab Agricultural University

41 PUBLICATIONS 286 CITATIONS

[SEE PROFILE](#)

Some of the authors of this publication are also working on these related projects:

synthesis of pheromones [View project](#)

Contents

Foreword	v
Preface	vii
1. General Chemistry	1
Learning Objectives	1
1.1 Valence Bond Theory	1
1.2 Hybridization and Shapes of Molecules	2
<i>sp Hybridization</i>	3
<i>sp² Hybridization</i>	5
<i>sp³ Hybridization</i>	5
<i>Lone Pair in Hybrid Orbitals</i>	7
1.3 Molecular Orbital Theory	8
<i>Linear Combination of Atomic Orbitals (LCAO)</i>	9
<i>MO Diagram of Homodiatomic Molecules</i>	11
<i>MO Diagram of Heteronuclear Diatomic Molecules</i>	14
1.4 Metallic Bond	17
<i>Theories of Metallic Bond</i>	17
1.5 Hydrogen Bond	20
<i>Types of Hydrogen Bond</i>	21
<i>Consequences of Hydrogen Bonding</i>	22
1.6 van der Waals Forces	24
1.7 Solid State	25
<i>Crystalline Solids</i>	26
<i>Amorphous Solids</i>	26
<i>Differences between Amorphous and Crystalline Solids</i>	26
1.8 Space Lattice and Unit Cell	27
1.9 Types of Unit Cell	28
1.10 Cubic Lattice	30
<i>Calculation of Number of Particles per Unit Cel</i>	31
<i>Density Computation</i>	31
1.11 Crystal Structure	34
<i>Packing Efficiency</i>	36
<i>Radius Ratio Rule</i>	38
<i>Relation between Void Radius and Atom Radius in Close Packing</i>	39
1.12 Bragg's Law – X-Ray Structure of Crystals	42
<i>X-Ray Structure of Crystals</i>	42
1.13 Liquid Crystals and Their Applications	45
<i>Classification of Liquid Crystals</i>	46
<i>Types of Mesophases</i>	47
<i>Liquid Crystalline Behavior in Homologous Series</i>	50
<i>Applications of Liquid Crystals</i>	51

1.14	Fullerenes – Structure and Applications	53
	<i>Applications</i>	54
	Key Terms	54
	Objective-Type Questions	55
	Review Questions	59
	Numerical Problems	61
	Answers	62
2.	Organic Reaction Mechanisms	65
	Learning Objectives	65
2.1	Bonding in Organic Molecules	65
	<i>Homolytic Fission</i>	65
	<i>Heterolytic Fission</i>	66
2.2	Electronic Displacement Effects in Organic Molecules	66
	<i>Inductive Effect</i>	66
	<i>Inductometric Effect</i>	69
	<i>Electromeric Effect</i>	69
	<i>Mesomeric or Resonance Effect</i>	69
	<i>Hyperconjugative Effect: Baker–Nathan Effect</i>	72
2.3	Reactive Intermediates	73
	<i>Free Radicals</i>	74
	<i>Carbocations</i>	76
	<i>Carbanions</i>	78
	<i>Carbene</i>	80
2.4	Attacking Reagents in an Organic Reaction	81
	<i>Electrophiles</i>	81
	<i>Nucleophiles</i>	81
2.5	Types of Organic Reactions	82
2.6	Addition Reactions	82
	<i>Nucleophilic Addition</i>	83
	<i>Electrophilic Addition</i>	86
	<i>Free Radical Addition</i>	88
2.7	Substitution Reactions	89
	<i>Nucleophilic Substitution (S_N)</i>	89
	<i>Electrophilic Substitution</i>	92
	<i>Nucleophilic Aromatic Substitution</i>	96
	<i>Free Radical Substitution</i>	98
2.8	Elimination Reactions	99
	<i>Bimolecular Elimination Reactions (E₂)</i>	99
	<i>Unimolecular Elimination Reactions (E₁)</i>	100
	<i>Elimination versus Substitution</i>	101
2.9	Rearrangement Reactions	101
2.10	Some Name Reactions	102
	<i>Aldol Condensation</i>	102

<i>Cannizzaro Reaction</i>	104
<i>Pinacol–Pinacolone Rearrangement</i>	106
<i>Beckmann Rearrangement</i>	108
<i>Hofmann Rearrangement or Degradation</i>	109
Key Terms	111
Objective-Type Questions	111
Review Questions	114
Answers	116
3. Stereochemistry	119
Learning Objectives	119
3.1 Stereoisomerism	119
<i>Types of Stereoisomers</i>	120
3.2 Chirality and Optical Activity	120
<i>Concept of Chirality</i>	120
<i>Chirality and Symmetry Elements</i>	121
<i>Fischer Projections</i>	123
<i>Concept of Optical Activity</i>	125
<i>Measurement of Optical Activity</i>	125
<i>Relation between Chirality and Optical Activity</i>	126
3.3 Optical Isomerism	130
<i>Enantiomers and Optical Activity</i>	130
<i>Diastereomers and Optical Activity</i>	131
<i>Relation between Number of Optical Isomers and Stereogenic Carbons</i>	132
3.4 Configuration	133
<i>Relative Configuration (D and L System)</i>	134
<i>Absolute Configuration (R and S System)</i>	136
3.5 Geometrical Isomerism	140
<i>cis and trans Nomenclature</i>	140
<i>E and Z Nomenclature</i>	142
<i>Geometrical Isomerism in Cyclic Structures</i>	143
3.6 Conformational Isomerism	144
<i>Newman Projections</i>	144
<i>Conformations</i>	144
<i>Conformations of Ethane</i>	145
<i>Conformations of n-Butane</i>	146
<i>Conformations of Cyclohexane</i>	146
Key Terms	148
Objective-Type Questions	149
Review Questions	152
Numerical Problems	155
Answers	156

4. Chemical Kinetics	157
Learning Objectives	157
4.1 Rate of Reaction	158
<i>Measurement of Rate of Reaction</i>	158
<i>Factors Influencing Rate of Reaction</i>	159
<i>Rate Laws</i>	159
4.2 Order and Molecularity	160
<i>Order</i>	160
<i>Molecularity</i>	162
4.3 Integrated Rate Equations and Half Lives	163
<i>Zero-Order Reactions</i>	163
<i>First-Order Reactions</i>	163
<i>Second-Order Reactions</i>	164
<i>Third-Order Reactions</i>	167
<i>Higher nth Order Reactions</i>	168
4.4 Pseudo-First-Order	176
4.5 Temperature Dependence of Rate of Reactions	177
<i>Temperature Coefficient</i>	177
<i>Activation Energy</i>	177
<i>Arrhenius Equation</i>	178
4.6 Theories of Reaction Rates	183
<i>Collision Theory</i>	183
<i>Transition State Theory (Absolute Reaction Rate Theory or Activated Complex Theory)</i>	185
4.7 Catalysts	187
<i>Types of Catalysts</i>	187
<i>Types of Catalytic Reactions</i>	187
<i>Mechanism of Catalysis</i>	188
Key Terms	189
Objective-Type Questions	189
Review Questions	193
Numerical Problems	196
Answers	198
5 Electrochemistry	199
Learning Objectives	199
5.1 Electrical Conductance	200
<i>Types of Electrolytes</i>	200
<i>Conductivity of Solutions of Electrolytes</i>	200
<i>Specific Conductance</i>	201
<i>Equivalent Conductance</i>	202
<i>Molar Conductance</i>	202
<i>Ionic Conductance</i>	202
<i>Factors Affecting Conductance</i>	204

	<i>Transport (Transference) Number</i>	204
	<i>Interionic Attraction Theory of Conductance</i>	205
	<i>Hydration of Ions</i>	205
5.2	Electrochemical Cells	208
	<i>Redox Reactions</i>	208
5.3	Electrode Potential	209
	<i>Origin of Electrode Potential</i>	209
	<i>Oxidation Potential</i>	210
	<i>Reduction Potential</i>	210
	<i>Standard Electrode Potential (E^0)</i>	210
5.4	Galvanic Cells	211
	<i>Construction and Working</i>	211
	<i>Salt Bridge</i>	212
	<i>EMF of the Cell and Free Energy Change</i>	212
	<i>Electrochemical Conventions and Notations</i>	213
5.5	Nernst Equation	214
	<i>Derivation</i>	214
5.6	Measurement of EMF of a Cell	221
	<i>EMF and Potential Difference</i>	221
	<i>Potentiometric Measurement</i>	221
5.7	Reference Electrodes	222
	<i>Standard Hydrogen Electrode (Normal Hydrogen Electrode)</i>	223
	<i>Calomel Electrode</i>	223
	<i>Silver–Silver Chloride Electrode</i>	224
5.8	Single Electrode Potential	225
	<i>Measurement of Single Electrode Potential</i>	226
	<i>Applications</i>	226
	<i>Electrochemical Series</i>	227
5.9	Types of Electrodes	230
5.10	Glass Electrode	233
	<i>Construction</i>	233
	<i>Glass Electrode Potential</i>	234
	<i>Advantages and Limitations</i>	235
	<i>Determination of pH using Glass Electrode</i>	236
5.11	Concentration Cells	239
	<i>Electrode Concentration Cells</i>	239
	<i>Electrolyte Concentration Cells</i>	239
	<i>Applications of Concentration Cells</i>	242
5.12	Batteries	244
	<i>Discharging and Charging of a Battery</i>	244
	<i>Characteristics of a Battery</i>	245
5.13	Classical Batteries	247
	<i>Primary Cells</i>	247
	<i>Secondary (Storage) Cells</i>	249
5.14	Modern Batteries	251

<i>Metal–Air Batteries</i>	251
<i>Nickel–Metal Hydride Batteries</i>	252
<i>Lithium Batteries</i>	253
5.15 Fuel Cells	254
<i>Comparison with Conventional Galvanic Cells</i>	254
<i>Advantages and Limitations</i>	255
<i>Cell Representation</i>	255
<i>Hydrogen–Oxygen Fuel Cell</i>	255
<i>Types of Fuel Cells</i>	257
5.16 Corrosion	259
5.17 Corrosion in Metals and Alloys	259
<i>Causes of Corrosion</i>	259
<i>Effects of Corrosion</i>	260
5.18 Corrosion Cell	260
5.19 Types of Corrosion	261
<i>Dry Corrosion (Direct Chemical Attack)</i>	261
<i>Wet Corrosion (Electrochemical Theory of Corrosion)</i>	262
<i>Differences between Dry Corrosion and Wet Corrosion</i>	263
5.20 Types of Electrochemical Corrosion	264
<i>Differential Metal Corrosion (Galvanic Corrosion)</i>	264
<i>Differential Aeration Corrosion (Concentration Cell Corrosion)</i>	265
<i>Waterline Corrosion</i>	266
<i>Crevice Corrosion</i>	266
<i>Pitting Corrosion</i>	267
5.21 Other Types of Corrosion	268
5.22 Factors Influencing Rate of Corrosion	271
<i>Primary Factors</i>	271
<i>Secondary Factors</i>	272
5.23 Corrosion Control Methods	274
5.24 Protective Coatings	276
Key Terms	278
Objective-Type Questions	279
Review Questions	284
Numerical Problems	288
Answers	290
6. Water and Its Treatment	293
Learning Objectives	293
6.1 Sources of Water	293
6.2 Impurities in Water	294
6.3 Hardness of Water	294
<i>Formation of Hard Water</i>	294
<i>Types of Hardness</i>	295
<i>Degree of Hardness</i>	295
<i>Units of Hardness</i>	296

6.4	Determination of Hardness of Water	299
	<i>Soap Solution Method</i>	299
	<i>Complexometric Titration Method Using EDTA</i>	301
6.5	Alkalinity of Water	304
	<i>Types of Alkalinity</i>	304
	<i>Estimation of Alkalinity</i>	304
6.6	Analysis of Water	308
	<i>Determination of Chlorides by Argentometric Method</i>	308
	<i>Determination of Fluoride by SPADNS Method</i>	309
	<i>Determination of Nitrate by Phenol Disulphonic Method</i>	309
	<i>Determination of Sulphate by Gravimetric Method</i>	310
	<i>Determination of Dissolved Oxygen by Winkler's Method</i>	311
6.7	Disadvantages of Hard Water	312
	<i>Domestic Purposes</i>	312
	<i>Industrial Purposes</i>	312
6.8	Potable Water	313
	<i>Pretreatment</i>	313
	<i>Removal of Suspended Impurities</i>	313
	<i>Disinfection</i>	314
	<i>Desalination of Brackish Water</i>	315
6.9	Boiler Feed Water	317
	<i>Characteristics of Boiler Feed Water</i>	318
	<i>Boiler Troubles/Problems</i>	318
6.10	Techniques for Water Softening	322
	<i>External Treatment for Softening Water</i>	322
	<i>Internal Treatment for Softening Water</i>	327
6.11	Sewage	333
	<i>Characteristics of Wastewater</i>	333
	<i>Sewage Treatment</i>	334
	Key Terms	338
	Objective-Type Questions	338
	Review Questions	342
	Numerical Problems	346
	Answers	350

7. Chemistry of Engineering Materials 353

	Learning Objectives	353
7.1	Some Important Terms and Definitions	354
7.2	Classification of Polymers	355
7.3	Types of Polymerization	358
	<i>Addition Polymerization or Chain-Growth Polymerization</i>	358
	<i>Condensation Polymerization or Step-Growth Polymerization</i>	358
	<i>Copolymerization</i>	360
7.4	Mechanism of Addition Polymerization	361

	<i>Free Radical Mechanism</i>	361
	<i>Ionic Polymerization</i>	362
7.5	Polymerization Techniques	366
	<i>Bulk Polymerization</i>	366
	<i>Solution Polymerization</i>	366
	<i>Suspension (Pearl) Polymerization</i>	367
	<i>Emulsion Polymerization</i>	368
7.6	Molecular Weights of Polymers	369
7.7	Structure–Property Relationship of Polymers	372
	<i>Glass Transition Temperature (T_g)</i>	374
7.8	Plastics	376
	<i>Properties and Uses of Plastics as Engineering Materials</i>	376
	<i>Classification of Plastics</i>	377
	<i>Compounding of Plastics</i>	377
	<i>Casting of Plastics</i>	379
	<i>Spinning of Plastics</i>	379
	<i>Plastic Molding Methods</i>	381
7.9	Some Important Commercial Thermoplastics	387
	<i>Polyethylene (PE)</i>	387
	<i>Polypropylene</i>	389
	<i>Polystyrene</i>	389
	<i>Polyvinylchloride</i>	390
	<i>Polyvinyl Acetate</i>	391
	<i>Polytetrafluoroethylene/Teflon</i>	391
	<i>Polymethyl Methacrylate/Plexiglass</i>	392
	<i>Polyurethanes</i>	392
7.10	Some Important Commercial Thermosetting Resins	393
	<i>Phenol–Formaldehyde Resins</i>	393
	<i>Amino Resins</i>	395
	<i>Silicone Resins</i>	397
7.11	Elastomers (Rubbers)	398
	<i>Natural Rubber (NR)</i>	398
	<i>Processing of Latex</i>	398
	<i>Processes for Improvement of Properties of Natural Rubber</i>	399
	<i>Synthetic Rubbers</i>	401
7.12	Some Important Synthetic Rubbers	401
	<i>Butyl Rubber (GR-I Rubber)</i>	401
	<i>Polychloroprene (Neoprene or GR-M Rubber)</i>	402
	<i>Styrene–Butadiene Rubber (SBR) (Buna-S or GR-S Rubber)</i>	402
	<i>Nitrile Rubber (NBR) (Buna-N or GR-A Rubber)</i>	403
	<i>Polysulphide Rubber</i>	403
	<i>Silicone Rubber</i>	404
7.13	Fibers	404
	<i>Physical Properties</i>	404
	<i>Types of Fibers</i>	405
	<i>Spinning Processes</i>	405

7.14	Some Important Synthetic and Semisynthetic Fibers	406
	<i>Nylons (Polyamides)</i>	406
	<i>Polyethylene Terephthalate (Polyester)</i>	408
	<i>Acrylic Fibers (Polyacrylonitriles)</i>	409
7.15	Composites	410
	<i>Classification of Composites</i>	411
	<i>Fiber Reinforced Plastics (FRPs)</i>	412
7.16	Adhesives	413
	<i>Types of Adhesives</i>	413
	<i>Epoxy Resins (Araldite)</i>	413
7.17	Conducting Polymers	414
	<i>Conducting Polymers with Conjugated π-Electrons</i>	415
	<i>Applications of Conducting Polymers</i>	418
7.18	Semiconducting Polymers	419
7.19	Natural Polymers (Biopolymers)	419
	<i>Starch</i>	419
	<i>Cellulose</i>	420
	<i>Proteins</i>	421
	<i>Nucleic Acids</i>	421
	<i>Natural Rubber</i>	421
7.20	Ion Exchange Resins	421
7.21	Biodegradable Polymers	422
	<i>Classification of Biodegradable Polymers</i>	423
	<i>Applications of Biodegradable Polymers</i>	423
7.22	Refractories	424
	<i>Classification of Refractories</i>	424
	<i>Characteristics of Refractories</i>	424
	<i>Manufacture of Refractory Materials</i>	427
	<i>Some Common Refractories</i>	428
	<i>Causes for Failure of Refractory Material</i>	429
7.23	Alloys	430
	<i>Purpose of Making Alloys</i>	430
	<i>Manufacture of Alloys</i>	431
	<i>Classification of Alloys</i>	431
7.24	Nanotechnology	434
	<i>General Methods of Synthesis and Characterization</i>	435
	<i>Applications of Nanomaterials</i>	438
	<i>Carbon Nanotubes</i>	439
	Key Terms	442
	Objective-Type Questions	443
	Review Questions	448
	Numerical Problems	453
	Answers	454

8. Fuels and Combustion	455
Learning Objectives	455
8.1 Classifications of Fuels	456
<i>Classification Based on Physical State</i>	456
<i>Classification Based on Occurrence</i>	457
<i>Characteristics of a Good Fuel</i>	458
8.2 Calorific Value	458
<i>Units</i>	458
<i>Gross and Net Calorific Values</i>	459
8.3 Determination of Calorific Value	459
<i>Theoretical Determination</i>	459
<i>Experimental Determination</i>	461
8.4 Combustion	466
<i>Concepts</i>	466
<i>Calculations</i>	467
8.5 Solid Fuels – Coal	472
<i>Types of Coal</i>	473
<i>Uses of Coal</i>	473
<i>Pulverized Coal</i>	473
8.6 Proximate and Ultimate Analyses of Coal	474
<i>Proximate Analysis</i>	474
<i>Ultimate Analysis</i>	476
8.7 Coke	479
<i>Coke as Metallurgical Fuel</i>	480
<i>Caking and Coking Coals</i>	480
<i>Coking Processes</i>	480
8.8 Biofuels	483
<i>Biomass</i>	484
<i>Biodiesel</i>	485
<i>Mechanism for acid-catalyzed transesterification (Figure 11):</i>	487
<i>Mechanism for base-catalyzed transesterification (Figure 12):</i>	488
<i>Biogas</i>	489
8.9 Liquid Fuels – Petroleum	490
<i>Origin</i>	490
<i>Composition</i>	490
<i>Production from Refining of Crude Oil</i>	490
<i>Fractional Distillation</i>	491
<i>Cracking</i>	492
<i>Catalytic Reforming</i>	494
<i>Compounds Isolated from Crude Oil</i>	496
<i>Knocking</i>	496
8.10 Power Alcohol and Synthetic Petrol	498
<i>Power Alcohol</i>	498
<i>Synthetic Petrol</i>	499
8.11 Gaseous Fuels	501

<i>Liquefied Petroleum Gas</i>	502
<i>Natural Gas</i>	502
<i>Coal Gas</i>	503
<i>Producer Gas</i>	504
<i>Water Gas</i>	505
<i>Flue Gas Analysis</i>	506
8.12 Lubricants	507
<i>Principle of Lubrication</i>	508
<i>Mechanism of Lubrication</i>	510
<i>Classification of Lubricants</i>	511
<i>Additives for Lubricants</i>	513
<i>Properties of Lubricants and their Measurement</i>	514
8.13 Rocket Propellants	521
8.14 Explosives	523
<i>Classification of Chemical Explosives</i>	523
<i>Characteristics of Chemical Explosives</i>	525
<i>Preparation of Explosives</i>	526
Key Terms	529
Objective-Type Questions	529
Review Questions	532
Numerical Problems	537
Answers	541
9. Chemical Methods of Analysis	543
Learning Objectives	543
9.1 Physical Analysis	543
9.2 Chemical Analysis	544
9.3 Volumetric (Titrimetric) Analysis	545
<i>Some Terms Used in Volumetric Analysis</i>	545
<i>Different Types of Volumetric Titrations</i>	547
9.4 Neutralization Titrations (Acid–Base Titrations)	547
<i>Selection of Indicators and Their Action</i>	547
<i>Acid–Base Titration Curves</i>	548
<i>Estimation of Alkalinity of Water</i>	548
9.5 Redox Titrations	549
<i>Redox Indicators</i>	549
<i>Potassium Permanganate Titrations</i>	550
<i>Potassium Dichromate Titrations</i>	550
<i>Iodine Titrations</i>	550
9.6 Complexometric Titrations	551
<i>Selection of Indicators</i>	551
<i>Estimation of Hardness of Water by EDTA Method</i>	551
9.7 Precipitation Titrations	552
<i>Argentometric Titration</i>	552

9.8 Gravimetric Analysis	553
<i>Precipitation Method</i>	553
<i>Volatilization Method</i>	554
Key Terms	554
Objective-Type Questions	554
Review Questions	556
Answers	557
10. Instrumental Methods of Analysis	559
Learning Objectives	559
10.1 Electroanalytical Methods	559
<i>Conductometry</i>	559
<i>Potentiometry</i>	566
10.2 Electromagnetic Radiation	569
<i>Characteristics of Electromagnetic Radiation</i>	569
<i>Electromagnetic Spectrum</i>	569
10.3 Molecular Spectroscopy	570
<i>Types of Energy Changes in a Molecule</i>	570
<i>Interaction of Electromagnetic Radiation with Molecule and Origin of Electronic Spectra</i>	571
<i>Laws of Absorbance of Radiation</i>	572
10.4 Basic Spectroscopy Instrumentation	574
<i>Essential Components</i>	574
<i>Block Diagrams for Standard Emission and Absorption Spectrometers</i>	574
<i>Resolving Power and Signal-to-Noise Ratio</i>	575
<i>Width and Intensity of Spectral Lines</i>	576
10.5 Infrared Spectroscopy	576
<i>Interaction between Infrared Radiations and Molecular Vibrations</i>	577
<i>Modes of Vibration</i>	577
<i>Analysis of IR Spectra</i>	579
<i>Recording of IR Spectrum (Instrumentation for IR Spectroscopy)</i>	582
<i>Applications of IR Spectroscopy</i>	583
<i>Fourier Transform (FT)</i>	584
10.6 NMR Spectroscopy	586
<i>Concepts and Theory</i>	586
<i>Interaction between Nuclear Spin and Magnetic Field</i>	587
<i>Instrumentation of NMR Spectroscopy</i>	590
<i>Chemical Shift</i>	590
<i>Spin-Spin Interaction</i>	594
<i>Interpretation of NMR Spectra</i>	596
<i>Representative NMR Spectra of Some Organic Molecules and Their Interpretation</i>	598
<i>Simplification of Complex Spectra</i>	600
¹³ C NMR	601
10.7 UV-Visible Spectroscopy	604
<i>Chromophore and Auxochrome</i>	604

	<i>Electronic Transitions</i>	604
	<i>Representation of UV–Visible Spectra</i>	605
	<i>Applications of UV Absorption Spectroscopy</i>	605
	<i>Woodward–Fisher Rules for Calculating Absorption Maximum in Conjugated Dienes</i>	606
10.8	Mass Spectrometry (MS)	609
	<i>Theory</i>	609
	<i>Representation of Mass Spectra</i>	609
	<i>Instrumentation</i>	613
	<i>Mass Spectra of Some Simple Organic Compounds</i>	617
10.9	Chromatography	621
	<i>Types of Chromatography</i>	621
	Key Terms	624
	Objective-Type Questions	624
	Review Questions	628
	Numerical Problems	634
	Answers	635
